Time4Learning can help your student achieve all their first grade science goals with our flexible, student-paced curriculum, interactive lessons, and printable worksheets that make learning fun. Generally, a 1st grade science curriculum should teach the following: Life science (plants, animals, habitats) Classification of animals and different animal habitats Distinguishing between living and nonliving things Earth and space science (solar system and beyond) States of matter (solid, liquid, gas) Type of light energy; the characteristic of sound energy (pitch, volume, etc.) Earth/space science including the water cycle and weather The different parts and functions of plants A first grade science curriculum should research and expand on what students learned in kindergarten, teach more advanced concepts on these topics, and introduce new material. Tons of offline activities and printable worksheets help reinforce online material. 1st graders will learn about the water cycle, plants, insects and are introduced to some basic elements. From the moment they can crawl and communicate, they begin to use their five senses to explore everything around them as they ask questions to learn more. With a simple-to-follow format that builds on previous material, students will be able to build a strong science foundation as they learn about the physical world around them, Earth, plant and animal life, the scientific process, and more. In addition to providing an award-winning curriculum for students, Time4Learning also offers convenient tools for parents that help you save time and homeschool with confidence. Children have an innate curiosity about the world around them. Since science standards vary by state, be sure to inquire about what your state's specific homeschool laws are as they pertain to first grade science. Automated grading and recordkeeping makes it easy to keep track of student progress. 24/7 access means students can log in anytime, even on weekends. Science curriculum features investigative activities so that students can think like scientists. Curriculum calculators and activity planners help parents plan for the year. Students can repeat science lessons for maximum understanding and retake quizzes to improve their grades. Below is a general overview of the science objectives for first grade. Multimedia-based activities help students learn STEM and build their science skills. An effective first grade science curriculum will also give students the opportunity to make real life connections with what they are studying. Students can adjust grade levels at anytime to review previous science concepts or get a head start. Students should also learn the importance of observation, note taking, and communicating information, all essential skills that they will put to use as they continue to learn more advanced science concepts throughout the years. Detailed lesson plans provide information on each lesson and activity. First graders should be learning fundamentals skills in topics like physical science, life science, and Earth science. As a Full Curriculum Engaging curriculum teaches important science concepts through fun activities. A first grade science curriculum should quench that thirst for knowledge as students learn foundational science skills, take part in hands-on activities, and make real world connections. This page will give you information on what to teach in science for 1st grade, what to look for in a first grade science curriculum, and how Time4Learning can give your student a strong science foundation and help them succeed. Includes tons of ideas for hands-on projects as well as science supply lists. As a Supplement Flexible, student-paced approach allows students to progress at their own pace, skip lessons and only work on those they need help with. In a way, children are natural born scientists. Quizzes assess students on what they know and help parents monitor progress. Distinguish between the states of matter and how they can change Ask scientific questions, observe using their senses, create hypothesis, draw conclusions, share data Distinguish between living and nonliving things Understand the water cycle, weather patterns, and seasons Identify the different parts and functions of plants Classify animals and the different habitats they live in The Time4Learning first grade science curriculum teaches students through interactive lessons and activities, printable worksheets, and more. Interactive format helps students with different learning styles build a solid foundation in science. Introducing students to science during the early elementary years helps prepare them for more advanced science concepts that they will learn in the years to follow. Online format means that students can learn from home and eliminates the need to drive to a tutoring center or library. Whether you use Time4Learning as a full curriculum or supplement, below are all the features and benefits you can expect to gain. Basically, 1st grade science helps students start to understand the world around them better.
